OUR COMPANY

Multidisciplinary expertise spanning over general trading, e-commerce, financial advisory, event management, and technical services - all tailored to promote sustainability and drive positive environmental impact.

OUR DEDICATED BUSINESS PROFESSIONALS

Our team brings over a decade of international expertise, with a combination of innovation, and passion to help your business exceed its Environmental, Social, and Governance (ESG) goals.

We work closely with you to develop personalized strategies that not only enhance your financials and operations but also contribute positively to the planet and society.

OUR SERVICES

General Trading & E-Commerce: Procurement solutions for conventional and sustainable goods and services, focusing on sourcing high-quality products at competitive prices. Specializing in diverse sectors such as consumer goods, industrial supplies, and eco-friendly alternatives.

Investment Advisory: Integrate ESG standards into your financial and operational plans for sustainability and resilience. Services include ESG strategy development, ESG reporting for compliance, and advisory on green financing to optimize environmental and social impact.

Event Management Services: Organize impactful, eco-friendly meetings, conferences, summits, and even parties. Emphasize carbon-neutral and zero-waste events to create memorable experiences while promoting sustainability. Full service from planning and logistics to post-event analysis.

Technical Services: Project development services focused on energy efficiency, renewable energy, e-mobility, battery energy storage systems, and customized robotic solutions for any type of industry or business. From feasibility studies to engineering, installation, and operations, our expertise supports the transition to a sustainable future
